To Our Fellow Industry Leaders:

The voice for the water recycling industry at the Capitol, the Texas Water Recycling Association (TXWRA) is committed to developing positive, sustainable solutions to Texas' water challenges. As an industry leader who understands the critical nature of clean water supplies for our growing state, we encourage and invite you to join our efforts.

When you plug into TXWRA's network, you get **access, collaboration, and representation**: access to policy makers and water recycling industry leaders; opportunities for collaboration to discuss best practices in the recycling and conservation of water; and legislative and regulatory representation supporting industry efforts to recycle and conserve water.

Just a few of the other benefits of membership in TXWRA include:

- Timely news and updates through a subscription to our communications program, including our e-newsletter and other resources to enhance our collective outreach efforts.
- Listing in and access to TXWRA's directory of other leading industry professionals.
- Discounted rates for the TXWRA Conference as well as other TXWRA-supported workshops and seminars.
- Professional recognition through your commitment to TXWRA's Code of Ethics and best practices.

Membership in TXWRA consists of two primary levels: **Full** and **Affiliate**.

- Full membership – for water recyclers – encourages your voting participation on committees along with Board eligibility, including the Executive committee. Full dues are \$5,000 per year.
- Affiliate membership – for users of water recycling and other interested parties – allows committee participation. Voting Affiliate dues are \$4,000 and Non-voting Affiliate dues are \$2,500 annually.
- We are exploring membership options for Educational and Research institutions. If you are interested in working with TXWRA in one of those capacities, please let us know.

For questions about membership, please contact Jennifer Perkins at jperkins@txwra.org or visit our website at www.txwra.org. The Texas Water Recycling Association looks forward to working with you as we grow water recycling and conservation in Texas.

Best wishes,

John J. Tintera
President
